Welcome

Welcome to United Factions, the Minecraft server that is specialized in Factions and everything to do with Factions. United Factions wants you the player to fully understand the dynamics in our Faction server and offers you, the player this guide to be able to do so.

We really try to keep things as simple as possible here, but we are always open for improvement.

Starting on United Factions

When you first join our server you spawn in our lobby server. In this server there is a lot of activity going on. The lobby server is **our main server**.

A few things you will find when you spawn:

- The **Auction house**, this is where you can find auctions of other players, and you can start your own auctions here.
- The **Bank of United Factions**, this is where you can exchange your balance for emeralds.
- The **Dungeon Skeleton,** this is where you can access the dungeons of United Factions.
- The **Voting Office,** this is where you can read more about Voting and earning cash for your vote!

The Rules & Guidelines

Rules & Guidelines are listed on our website, at https://unitedfactions.net/rules

We have removed them of the Wiki to keep them up to date in 1 place.

Frequently Asked Questions

This section covers some frequently asked questions that we get from new players.

- **Is villager trading enabled?**
  Yes villager trading is enabled.
- **How can I go to the wild?**
  Type /warp factions, then type **/wild**
- **Is it possible to have villagers breeding when mobs are stacked?**
  Yes because villagers are not stacked!
- **Are you allowed to make a base in the Nether or the End?**
  Yes you are allowed to build a base in Nether or the End, but you cannot claim in these worlds!
  These worlds might be reset at any given time! Be careful with leaving your stuff in the Nether or the End!
- **Entities as zombies, ender man, creepers, chicken and cows are all stacking, is this a bug?**
  This is to guarantee server performance with higher player loads!
  - **But I have some chicken, cows, pigs I want to breed! is that still possible?!**
    Yes it is, just feed them and the server will unstack them for you and make breeding possible.
    Note: If you try to breed in a 1x1 block, aka inside an egg farmer, it won't work. Use a bigger space to bread.

End Portal creation tips from tommybms

Before you contact a member of staff, make sure all ender eyes are placed facing the middle. If one of them faces another direction, the end portal will not activate itself.

- tommybms experienced issues with this on the 5th of January 2021.
